**SA/PD Rec'd MAY 24 1991**

Dear Sirs: Supplement to plan of operations for BJ-2 and  
BJ-5 mining claims in Emery County, Utah.

Have enclosed a map with three (3) area's locating  
designated A,B, and C. Area A, will be mined during  
calendar years 1991 and 1992. Area B, will be mined late  
in 1992 and should last thru 1994. For the remainder of the  
ten (10) year period Area C will be adequate.

Area A does contain 15 acres, but only 6 to 7 acres will  
be disturbed. Dust control measures that has been and  
will be used on the road, Chloride has been sprayed to compact  
and minimize dust. In the mine all milling has ceased and  
is being done at a another established area in Sevier County.  
A 30 foot barrier wall will be left against the banks of South  
Salt wash as requested by the B.L.M.

Blasting will be approximately 120 holes at single intervals  
approximately once every 6 weeks.

The quarry hole will be kept to a minimum of 100 feet from  
county road. Before the time of a sediment problem could  
begin, sedimentation basins will be constructed around the quarries.

RECEIVED

MAY 28 1991

DIVISION OF  
OIL GAS & MINING

The high walls in the quarries will be reduced to at least a 3 to 1 slope and shaped as close as possible to the existing area. All drainage patterns will be restored along with reclamation as mining is completed.

The upper 1 or 2 inches of topsoil containing the cryptograms has been and will be stripped and stockpiled separately and replaced back on surface after all reclamation such as shaping and topsoil is finished.

The stockpiling of white gypsum will be kept out of sight as much as possible from being seen from I-70.

Thank You,

Lanny L. Jensen
